Image Scanner

As the fastest and most compact scanner in its class\*<sup>1</sup>, the A4 color duplex ADF fi-6140 is small enough to use at your desk

- The fastest and smallest scanner of its class\*<sup>1</sup> is capable of scanning an impressive 60 A4 pages / 120 images per minute
- The first scanner in its class to adopt higher end “fi-Series” functions:
  - Paper protection function
  - Intelligent multifeed function
  - Auto color recognition function
  - Auto document size recognition function
  - Auto deskew function
- The fi-6140 comes bundled with the “automatic job separation” function armed ScandAll PRO Ver1.5 image capture software.

\*<sup>1</sup> The fi-6140 belongs to the class of A4 ADF color scanners whose scanning speeds meet or exceed 40ppm / 80ipm (monochrome, A4, 200dpi). This statement stood true as of October 2007.

**Features**

**The fastest and most compact scanner in its class**

In addition to being the smallest scanner in its class, the fi-6140 is able to scan an impressive 60 pages or 120 images per-minute in monochrome (A4, 200dpi) as well as 40 pages or 80 images per-minute in color (A4, 200 / 300dpi). Furthermore, its ability to continuously scan 50 page mixed batch documents containing paper of different weight, quality and sizes enables the fi-6140 efficiently digitize large volumes of paper documents.

**The first scanner in its class to adopt high end "fi-Series" functions**

The fi-6140 is the first business scanner in its class to inherit highly regarded intelligent "fi-Series" automatic features from its higher end siblings. Such features facilitate worry free mixed batch scanning of documents containing paper of different weights, quality and sizes.

**Paper protection function**

This function puts users at ease with its ability to protect valuable documents by immediately stopping the scanning process when it recognizes that a jam is about to occur.

**Intelligent multifeed function**

The intelligent multifeed function simplifies pre-scanning preparation and improves efficiency by ignoring documents that tend to trigger false multifeed alerts, such as photo and sticky note attached documents.

**Speedy "auto-color recognition", "auto-size recognition" and "auto-deskew" functionality**

The fi-6140 is the first "dedicated image processing LSI" armed scanner in its class to offer such highly valued automatic functions. As a result, the fi-6140 brings about dramatic digitizing efficiencies through fast scanning and simultaneous high speed image processing.

**Excellent card feedability**

In addition to being able to scan embossed cards\*, the fi-6140 is able to scan up to 3 plastic cards at a time (up to 1.4mm thick) in order to meet a wide variety of business needs.

\* This applies to ISO 7810 cards

**Comes bundled with the "automatic job separation" function armed ScandAll PRO Ver1.5 image capture software**

The fi-6140 supports barcode and patchcode reading functionality which enables it to simultaneously scan and automatically separate different jobs with its automatic job separation function. The result is improved digitization efficiency.
